

# HOW IT WORKS

First, set up your discussion space!

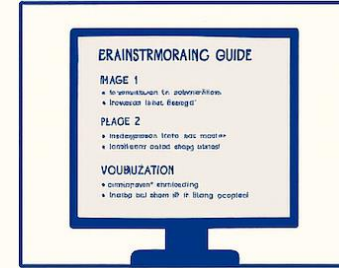

Think of the topic for discussion

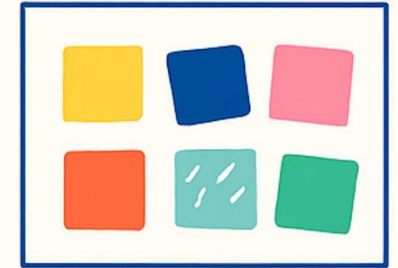

Follow the instructions to set up the program

Set up individual brainstorming time & choose your theme

Follow discussion prompts on the screen

Each person gets a unique Post-it colour to track their contribution

Start with silent Brainstorming

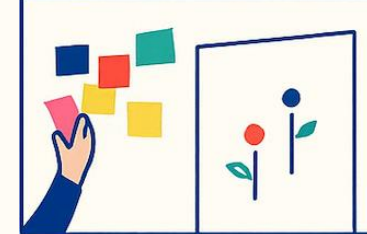

Come up with as many ideas as you can within the timeframe

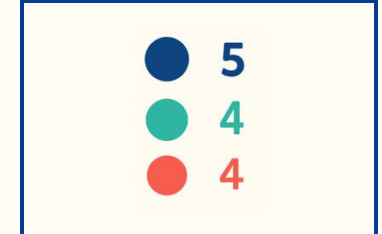

When time is up, discuss and share your ideas!

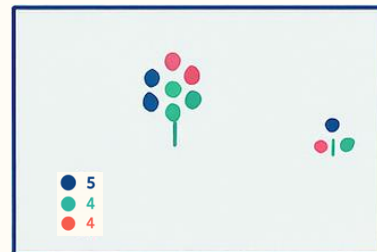

Discuss with the team to create clusters

Each cluster shows up on the screen in the selected theme!

A live counter shows each person's contribution to encourage participation

The resulting “artwork” clearly shows diversity of ideas presented, making discussions both fun and purposeful!
