

- 1 Each participant will have a particular color of post-it.
- 2 The team will **set the topic of the discussion** which will be visible on the screen.
- 3 The team can **set their own time duration** for the session.
- 4 The participants then **individually brainstorm** by writing their ideas down.
- 5 The team then comes together to **cluster the ideas into themes**, while having active discussion.
- 6 The visuals help keep a track of the number of clusters and how they are forming.

As the post-its get added to the cluster the number of petals increase and the size of the flower grows

Highlighting the organic growth of themes, showing collective focus emerging.

Themes emerge naturally as related ideas group together into clusters.

As discussions unfold, related ideas naturally cluster together, creating a shared visual record of collective thinking.

Shows the number of post-its per participant

By showing how many ideas each member adds, **CLUSTR** encourages balanced participation and friendly motivation.

Colors distinguish contribution, highlighting diversity of participation.

By showing how many ideas each member adds, **CLUSTR** encourages balanced participation and friendly motivation."
